## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:
2. The prior art teaches a field effect transistor where there is a source, channel, drain, gate insulator, and a gate, wherein the gate detects biological elements. The prior art also teaches of a field effect transistor as stated above, but there is a back gate and the detecting region is made on the channel.
3. The prior art is silent with respect to a field effect transistor where there is a source, channel, drain, gate insulator, and a gate, wherein the gate detects biological elements in combination with the gate being formed into multiple gates formed on the same channel in a lateral direction in the same fet. This combination has been found to be non-obvious thus allowed.
4. Claim 1-22 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
